

CAREER OBJECTIVE

Well-balanced, highly independent, critical-thinking, efficient, and detail-oriented graduate of University of Tulsa's Computer Sciences program with strong characteristics of leadership and teamwork - seeking employment that aligns with my degrees and interests.

Open to software engineering jobs that require quick, on-the-job, learning, as well as project work that also allows for focused attention on solving complex problems.

I appreciate the importance of software that works smoothly and reliably for all users and how that relates to customer service, no matter the industry.
